

In the Specification

Please amend the paragraph beginning at page 4, line 11 as follow:

Figure 1 is a scheme for making a block copolymer having non-fluorinated blocks bearing a hydrophilic ethylene glycol pendent groups.

Please amend the paragraph beginning at page 4, line 14 as follow:

A block copolymer comprising a fluorinated block and a non-fluorinated block and method of making the block copolymer are provided. Also provided herein ~~are~~ is a coating on an implantable device comprising the block copolymer and optionally a bioactive agent and method of using the implantable device.

Please amend the paragraph beginning at page 6, line 5 as follows:

Materials or polymers useful as the non-fluorinated blocks described herein include any polymers or macromers that can be directly attached to a fluorinated macromer described herein or polymers or macromers that can be functionalized to attach one or more functional groups such as hydroxyl, amino, halo, and carboxyl and other linking groups. Exemplary materials or polymers useful as the non-fluorinated blocks include, but are not limited to, polyolefins, polyalkylene oxides, polyglycols such as poly(ethylene glycol) and poly(propylene glycol), polylactic acid, poly(lactide-co-glycolide), polyhydroxyalkanoate, poly(hydroxybutyrate-co-valerate); polyorthoester; polyanhydride; poly(glycolic acid-co-trimethylene carbonate); polyphosphoester; polyphosphoester urethane; poly(amino acids); poly(cyanoacrylates); poly(trimethylene carbonate); poly(iminocarbonate); copoly(ether-esters) (e.g. PEO/PLA); polyalkylene oxalates; polyphosphazenes; biomolecules, such as fibrin, fibrinogen, cellulose, starch, collagen and hyaluronic acid; polyurethanes; silicones; polyesters; polyolefins;

polyisobutylene and ethylene-alphaolefin copolymers; acrylic polymers and copolymers; vinyl halide polymers and copolymers, such as polyvinyl chloride; polyvinyl ethers, such as polyvinyl methyl ether; polyvinylidene halides, such as ~~polyvinylidene fluoride and~~ polyvinylidene chloride; polyacrylonitrile; polyvinyl ketones; polyvinyl aromatics, such as polystyrene; polyvinyl esters, such as polyvinyl acetate; copolymers of vinyl monomers with each other and olefins, such as ethylene-methyl methacrylate copolymers, acrylonitrile-styrene copolymers, ABS resins, and ethylene-vinyl acetate copolymers; polyamides, such as Nylon 66 and polycaprolactam; alkyd resins; polycarbonates; polyoxymethylenes; polyimides; polyethers; epoxy resins; polyurethanes; rayon; rayon-triacetate; cellulose acetate; cellulose butyrate; cellulose acetate butyrate; cellophane; cellulose nitrate; cellulose propionate; cellulose ethers; and carboxymethyl cellulose. As used herein, the term "non-fluorinated block" may include fluorinated pendant groups such as $-CF_3$.
